ANNUAL PRICE LIST NEWER GLADS

Spring 1946

EVERETT CLARK
POQUONOCK, (WINDSOR) CONNECTICUT

FOREWORD

Thank you for the many kind letters and cards you have been so good to send me. I appreciate them. It gives one the assurance one needs to go ahead.

Due to the shortage of labor and my own time being I am unable to give you full information on the newest varieties but am listing only those which seemed to be the most worthy this past season. Perhaps another year will change the picture for these.

This year I am very short of many varieties so if you want to be sure of your bulbs order early. If you want your bulbs shipped at planting time, just state the date, and I will hold them for you, and ship at that time. But get your order in at once.

Terms: Single bulbs or bulblets at the ten rate, but no single item for less than five cents. 25 bulbs or bulblets at the 100 rate; 250 at the 1,000 rate. Pints and half pints in generous measure at the quart rates. Prepaid spring delivery on all order over \$2.00 — except for F. O. B. prices.

Cash, please. With the following extras of your selection: On orders up to \$5.00 you may select 10% in extra bulbs; \$5.00 to \$10.00, 15% in extra bulbs; \$10.00 to \$20.00, 20% in extra bulbs. Over \$20.00, 30% in extras. If you purchase large bulbs only in lots of 25 or more and will call for them or pay express charges, you may take a cash discount of one-third instead of extra bulbs. The above extras and discounts do not apply to F. O. B. quotations. Gratis bulbs for the names of your glad-loving friends.

Stock of bulbs for 1946 guarantee the same bright, clean, healthy stock as usual.

The past season has been an excellent growing one in this district. The planting stock which I am offering above is all grown from bulblets. These bulbs are of excellent quality, nice, plump, and high crowned.

(L) large, (M) medium, and (S) small sizes are those common to the trade. Large bulbs can be depended upon for the finest spikes. Medium size bulbs will prove very satisfactory. Small bulbs may do well.

Gladioli are very easy to grow. Following are a few of the principal rules to follow:

Select a place in the open garden where other tall growing plants will not shade them. Glads like and need full sunshine. Mix with the soil, any good grade of commercial fertilizer or well rotted compost or manure. Select good healthy bulbs. Place them in a trench at least five inches deep and about three inches apart in a straight or staggered row. Cover at once. It is better to plant deeper than too shallow. One or two light applications of fertilizer during the growing season, before buds appear, will help insure good spikes.

Join the Connecticut Gladiolus Society if you live nearby. You will be warmly welcomed by its members. Send the dues of \$2.00 to me and I will be glad to forward them to the Secretary.

SATISFACTION GUARANTEED

Successful control measures include the following:

(1) Treat the bulbs with Cyanogas-G or other fumigant upon digging the bulbs in the fall. Small quantities of bulbs may be put in paper bags or shoe boxes and sprinkled with Napthalene flakes — 1 ounce per 100 bulbs. Let the flakes evaporate. (2) Store in a cool, dry place and keep at a temperature of 40 degrees. Do not let the bulbs freeze. (3) Treat or soak in solution of bichloride of mercury (corrosive sublimate) before planting. Husk the bulbs previously, if possible. Soak for two hours in a solution of 1.1000. one tablet to one pint of water. Use stone crocks, glass jars, or wooden tubs—not a metal container. Large numbers of bulbs may be tied in sacks and kneaded on the floor in lieu of husking. Thorough soaking will destroy all thrips and their eggs. (4) Spray every week or ten days after the plants are six inches high. Do not wait until the buds appear. It is too late then. Effective spraying will control those thrips that have survived or that may appear from nearby infestations.

Tartar Emetic, used as follows, has proven very satisfactory in controlling thrips. Tartar Emetic 4½ teaspoonsful, sugar 1 2/3 cups, water 3 gals. Apply late in the afternoon or early evening.
